SKILLS TODAY FOR BRIGHTER TOMORROW

GUIDE

Contents

01 Overview Goals, success metrics, audience

02 Scope What v1 includes and leaves out

03 Site structure Three-section home page, other pages, services content

04 Functional requirements Contact, WhatsApp, carousel, logo animation, dark mode, testimonials, FAQ, admin

05 Design and brand Brochure colours, type, Corporate Memphis, favicon

06 Technical requirements Performance, SEO, links, security, database, errors, ownership, backups

07 Launch plan Milestones, pre-launch checklist, open questions

SECTION 01

Overview

> Growtick needs a mobile-first website with a very light three-section home page that presents all 19 services from its brochure and turns visitors into phone calls, WhatsApp chats and form enquiries. The site replaces the PDF brochure as the main thing Growtick shares with prospects.

Brand line: Skills Today for Brighter Tomorrow

Positioning: Skill Academy plus 360° Corporate Solutions — practical training, digital growth, finance and automation under one roof.

Goals

1. Show every Growtick service on the home page in one carousel, with full details one tap away.
2. Generate qualified leads through call, WhatsApp and the contact form.
3. Rank in local search for Growtick's core services (Tally training, websites, GST notices, printing, gifting).
4. Act as a live showcase of Growtick's own work: logo animation, design, web build, SEO.

Success metrics

Metric	Target	Measured with
Google PageSpeed Insights, mobile	90+ on all four scores (95+ home page)	PageSpeed Insights
Largest Contentful Paint	Under 1.5 s home page, 2.5 s inner pages, on 4G	PageSpeed Insights / Search Console
Contact conversion	3%+ of visitors call, WhatsApp or submit	Analytics events
Form submissions stored	100%, zero lost leads	Database + email alerts
Local search	Page 1 for 5 target keywords within 90 days	Search Console

Audience

- **Students and job seekers** looking for Tally Prime, graphic design, web, video/AI or computer basics courses.
- **Business owners and family-business successors** who need training, digital presence, accounting or tax help.
- **Corporates** buying gifting, printing, logo branding and B2B services.

SECTION 02

Scope

> Version 1 is a small multi-page website with a very light home page, plus a small admin panel for leads and content.

In scope

- Three-section home page plus Services, 19 service detail, Skill Academy, Testimonials, FAQ, About, Contact and Privacy pages
- Contact form, click-to-call, WhatsApp chat and share-to-WhatsApp
- Admin panel to read leads and edit testimonials, FAQs and service text
- Light and dark mode, SEO setup, analytics, favicon, 404 page
- Markdown backup of all content in a version-controlled repository

Out of scope (later versions)

- Online payments, course enrolment or fee checkout
- Student login or learning portal
- Blog and case studies
- Hindi / Kannada language versions
- Client portal for website-hosting customers

SECTION 03

Site structure

> The home page carries only three sections — hero, services carousel, contact. Every other detail lives on its own page, reached through the navigation menu or buttons.

Home page: three sections only

#	Section	Content	Rules
1	Hero	Animated logo, GROWTICK, one-line positioning (Skill Academy & 360° Corporate Solutions), two buttons: Call Now and WhatsApp	One SVG illustration under 30 KB; no video, no background photo
2	Services carousel	All 19 services as cards in one infinite loop	Each card: icon, number, title, one-line hook, "Know more" → service page, "Enquire" → contact. "View all services" link below
3	Contact	Short form (name, phone, service), Call, WhatsApp, Instagram @growtick	Map, address and full form live on the Contact page

Header: logo, menu, dark-mode toggle, Call button. **Footer:** one line — tagline, Instagram, Share to WhatsApp, Privacy link, copyright.

> **Not on the home page**
> Testimonials, FAQ, about, pricing tables, map embeds, chat widgets or any third-party script that isn't essential.

Home page budget

- Under 500 KB total transfer, under 50 KB JavaScript, under 15 requests.
- LCP under 1.5 s on 4G; PageSpeed Insights 95+ on mobile.
- One font family, 2 weights, self-hosted and preloaded (or system fonts).
- Icons as one inline SVG sprite; analytics loaded after the page is interactive.

Other pages

Page	URL	Content	Reached from
Services	/services	All 19 services grouped into 5 pillars, filter chips per pillar	Menu, "View all services"
Service detail (×19, one template)	/services/service-name	Full bullets, related FAQs, Enquire button, Share to WhatsApp	"Know more" on each carousel card
Skill Academy	/academy	Courses under 01 and 02, duration, batches, fees or "on request"	Menu
Testimonials	/testimonials	All client and student reviews, carousel + grid	Menu, footer
FAQ	/faq	8–10 questions, accordion	Menu, footer

Page	URL	Content	Reached from
About	/about	Growtick story, Naveen Jain, why Growtick (single roof, fast execution, end-to-end partner)	Menu
Contact	/contact	Full form, map, address, hours, all channels	Menu, every Enquire button
Privacy, 404	/privacy	DPDP privacy notice; custom error page	Footer; automatic

Navigation menu: Home · Services (dropdown of 5 pillars) · Skill Academy · Testimonials · FAQ · About · Contact. On mobile it is a full-screen hamburger menu; the floating WhatsApp button shows on every page except the home page's contact section.

One page per service (19 pages) is recommended over one per pillar, because each page can rank for its own local search term.

Services content (from the brochure)

Pillar	Service	Card copy
Skill Academy	01 Learn In-Demand Skills	Tally Prime (basic to advanced), Graphic Design (Photoshop), Web & Ecommerce, Video & AI workflows, Computer Basics (Email, MS Office)
Skill Academy	02 Next-Gen Business Training	Tailored coaching for successors, leadership readiness, smooth generational transition
Tech & Finance	03 360° Business Solutions	End-to-end partner, single roof, fast execution
Tech & Finance	04 Create Customer Need	Workflow audits, proactive pitch, lead growth
Web & Digital	05 Curated Static Website	Hosting from ₹400–900 (confirm period); domain rights remain with Growtick
Web & Digital	06 Google Business Listing	Verified setup, local search visibility, regional brand trust
Web & Digital	07 Social Media, CRM & Ads	Brand boost via automated CRM lead pipelines
Web & Digital	08 Assisted Digital Marketing	Managed Instagram launch posters
Creative & B2B	09 Festive AI Media & Diwali Posters	Custom festival videos; complimentary initial branded greetings
Creative & B2B	10 Logo Animation	Motion from static logos, ready for websites and Instagram reels
Creative & B2B	11 Photoshop Graphic Design	High-resolution layouts, promo assets, brand stationery
Creative & B2B	12 Commercial Printing	Business cards, brochures, posters, banners; fast bulk dispatch
Creative & B2B	13 Corporate Gifting Curation	Concept to packaging for partners, clients, employees
Creative & B2B	14 B2B Corporate Connections	Enterprise links for instant logo printing
Tech & Finance	15 AI-Powered Solutions	Automates daily workflows, lowers operating cost
Tech & Finance	16 Inventory & Stock Taking	Real-time stock tracking, prevents loss

Pillar	Service	Card copy
Tech & Finance	17 Accounting & Tally Prime	Billing setup, GST and ITR filing, year-end team support
Tech & Finance	18 Tax & GST Notice Handling	Compliance specialists, fast department replies, case closure
Trademark IP	19 Trademark Registration	Brand name, logo, tagline registration; full legal ownership

Copy note
Brochure claims like "Top Search Rank" and "Priority placement" should be softened on the website to "improved local visibility" — rankings can't be guaranteed and the claim invites complaints.

Carousel card hooks

Each carousel card shows the service number, title and a hook of 8 words or fewer. Examples:

- 01 Learn In-Demand Skills — Tally, design, web, AI and more
- 05 Curated Static Website — Hosting from ₹400
- 10 Logo Animation — Your logo, in motion
- 17 Accounting & Tally Prime — Setup, GST and ITR filing
- 18 Tax & GST Notice Handling — Fast expert replies
- 19 Trademark Registration — Own your brand name and logo

The full copy for all 19 services, in the table above, goes on the service detail pages.

SECTION 04

Functional requirements

> Every requirement below is a must-have for launch unless marked (P2).

Contact section

- **Form fields:** Name (required), Phone (required, 10-digit Indian mobile validation), Email (optional), Service of interest (dropdown of the 19 services + "Other"), Message (optional, 500 characters max).
- **On submit:** save to database, email alert to Growtick, optional WhatsApp/SMS alert to Naveen Jain, thank-you message on screen.
- **Direct options:** Click-to-call +91 95130 59059 (Naveen Jain), WhatsApp chat link with pre-filled text "Hi Growtick, I'm interested in…", Instagram @growtick, Google Business Profile link and embedded map on the Contact page (P2 if no address yet).
- **"Enquire" buttons** open the contact section with that service pre-selected — on carousel cards and every service page.

WhatsApp

- Floating WhatsApp chat button, bottom-right, on all screen sizes.
- **Share to WhatsApp** button in the footer and on each service page: opens a wa.me share with the page link + one-line description.

Infinite services carousel (home page)

- All 19 services in one seamless loop: about 1.2 cards visible on mobile, 3–4 on desktop.
- Slow continuous auto-scroll; pauses on hover, focus or touch. Swipe on mobile, arrows and keyboard on desktop.
- Built with CSS plus under 10 KB of JavaScript — no heavy slider library.
- Respects "reduce motion": auto-scroll stops and it becomes a plain horizontal scroll row.
- Card tap targets: "Know more" (service page) and "Enquire" (contact, service pre-selected).
- The same component is reused for reviews on the Testimonials page.

Logo animation

- Header and hero logo animate once on load (under 1.5 s), then stay static.
- Built as SVG/Lottie, under 50 KB, no layout shift.
- Doubles as a live demo of service 10 (Logo Animation).

Dark mode

- Toggle in header; first visit follows the device setting.
- Choice remembered on the device.
- All colours, illustrations and logo have a dark variant checked for contrast.

Testimonials

- Always reachable: own page, linked in the menu and footer, never empty. Minimum 3 at launch; collect real ones before go-live.
- Each: name, role/business, service used, quote, optional photo and star rating.
- Managed from the admin panel; only real, consented testimonials.

FAQ

Own FAQ page, accordion of 8–10 questions, editable in admin. Starter list:

1. Do you offer certificates for Skill Academy courses?
2. What are course durations, batch timings and fees?
3. What does the ₹400–900 website hosting include, and for what period?
4. Who owns the domain if I stop the service?
5. How long does Google Business Profile verification take?
6. Can you reply to a GST notice I already received?
7. How long does trademark registration take?
8. What is the minimum order for printing and corporate gifts?
9. Do you serve businesses outside our city?
10. How do I get the complimentary festive greetings?

Admin panel (access control)

- Login with email + password and 2-factor authentication.
- Roles: **Owner** (everything incl. users), **Editor** (content, testimonials, FAQs), **Viewer** (read leads only).
- Leads list: filter by service and date, mark status (New, Contacted, Converted, Closed), export CSV.
- Activity log of who changed what.

SECTION 05

Design and brand

> The site follows the brochure's look: deep green, fresh mint, magenta accents and a bold geometric display font.

Swatch	Token	Brochure use	Approx. value
	Deep green	Cover background, dark mode base	#042E1A
	Brand green	Headings, icons, big numbers	#16A34A
	Mint tint	Light cards and backgrounds	#EEFBF3
	Magenta	Accent headings, icons, divider bar	#DB2777
	Pink tint	Alternate cards	#FCEFF5
	Amber	Small overline labels	#F59E0B

Values are approximate — confirm with the brochure source files.

- **Typography:** geometric display font for headings (Space Grotesk or similar), clean sans for body (Plus Jakarta Sans or similar). Self-host fonts, 2 weights each max.
- **Illustration style:** Corporate Memphis — flat, friendly figures with bold shapes, in the brand palette. Used in the hero, About page and empty states. Licensed or custom-made illustrations only, in SVG.
- **Icons:** one consistent icon set matching the brochure (graduation cap, bulb, rocket, megaphone, printer, gift, handshake, scales).
- **Favicon:** Growtick "G" mark in brand green; sizes 16, 32, 180 (Apple touch) and 512 px, plus a web manifest icon. Works on light and dark browser tabs.
- **Layout:** mobile-first; cards stack to one column under 640 px; minimum tap target 44 px.
- **Accessibility:** WCAG 2.1 AA contrast in both themes, alt text on all images, full keyboard navigation.

SECTION 06

Technical and non-functional requirements

> The site must score 90+ on PageSpeed Insights mobile (95+ for the home page), store every lead safely, and never depend on one person's account.

Performance (PageSpeed Insights)

- Targets: Performance, Accessibility, Best Practices and SEO all 90+ on mobile; LCP under 2.5 s, CLS under 0.1, INP under 200 ms.
- Images in WebP/AVIF, lazy-loaded below the fold, fixed width/height to avoid shift.
- Home page under 500 KB and 50 KB JavaScript (see Site structure); inner pages under 1 MB and 150 KB JavaScript.
- Served through a CDN with caching and compression.

SEO

- Unique title and meta description per page targeting local keywords (e.g. "Tally Prime course", "GST notice reply", "website design", "corporate gifting" + city).
- One H1, logical H2/H3 per page; descriptive alt text.
- Structured data: LocalBusiness / ProfessionalService, FAQPage, Organization with social profiles, Service on each service page.
- sitemap.xml, robots.txt, canonical URLs, Open Graph and WhatsApp preview image (1200×630).
- Google Search Console and Google Analytics 4 (or a privacy-friendly alternative) connected.

Links and backlinks

- Website linked from the Google Business Profile, Instagram bio and WhatsApp Business profile.
- Listed on relevant directories (Justdial, IndiaMART, Sulekha) with identical name, phone and address.
- Client websites hosted by Growtick carry a small "Designed by Growtick" footer link (with client agreement).
- Outbound links open in a new tab with rel="noopener"; no broken links at launch.

Security layer

- HTTPS everywhere with HSTS; security headers (CSP, X-Frame-Options, Referrer-Policy).
- Web application firewall and DDoS protection (e.g. Cloudflare free tier).
- Form protection: honeypot field plus invisible CAPTCHA, rate limit of 5 submissions per IP per hour.
- Server-side validation and sanitisation of every input; no secrets in front-end code.
- Admin panel behind 2FA, login attempt limits and a non-obvious URL.

Database

- Managed database (e.g. Supabase/Postgres or Firebase) holding: leads, testimonials, FAQs, service text, admin users, activity log.
- Automatic daily backups kept 30 days.

- Personal data (phone, email) visible only to logged-in admins; follow India's DPDP Act — consent line on the form and a short privacy notice.

Error handling

- Form: inline field errors in plain language; if the save fails, show the phone/WhatsApp fallback and retry the submission.
- Custom 404 page with links back to services and contact.
- Images and carousels degrade gracefully if a file fails to load.
- Server errors logged and emailed to the site owner; uptime monitor with alerts.

Ownership and lock-down ("no master", "locked")

- No single master account: domain, hosting, database, Google and analytics accounts registered to a Growtick company email with at least 2 owner-level admins.
- Credentials kept in a shared password manager, not with the developer.
- Production locked: changes go through the repository, no direct edits on the live server; main branch protected.
- Domain locked at the registrar (transfer lock on) with auto-renew.

MD file backup

- All page content (services, FAQs, testimonials, copy) also kept as Markdown files in a private Git repository.
- Admin edits export to Markdown weekly so the site can be rebuilt from the repo if the database is lost.
- README.md documents setup, deployment and account locations.

SECTION 07

Launch plan

> A build of about 5 weeks from approved content to go-live, assuming copy and testimonials arrive in week 1.

Milestones

Week	Phase	Deliverables
1	Content and design	Final copy, testimonials collected, FAQ answers, Corporate Memphis illustrations briefed, sitemap and wireframes approved
2	Visual design	Light and dark mockups for home and page templates, logo animation, favicon set
3–4	Build	Home page, page templates, 19 service pages, contact form, database, admin panel, WhatsApp features, carousel, SEO setup
5	Test and launch	PageSpeed, security, cross-device and form tests; go-live; Search Console submission

Pre-launch checklist

- ☐ Access control: admin roles and 2FA working
- ☐ Logo animation plays once, under 50 KB
- ☐ PageSpeed Insights 90+ on all pages, 95+ on home page (mobile)
- ☐ Security layer: HTTPS, WAF, headers, form rate limit
- ☐ SEO: meta tags, schema, sitemap, Search Console
- ☐ Error handling: 404 page, form failure fallback, uptime alerts
- ☐ Database: leads saving, daily backups confirmed
- ☐ Dark mode checked on every page
- ☐ Corporate Memphis illustrations licensed and in place
- ☐ Links/backlinks: Google Business, Instagram, directories updated
- ☐ No master account: 2 owner admins on every service
- ☐ Locked: domain transfer lock, protected main branch
- ☐ MD file backup in Git repository
- ☐ Testimonials page live with at least 3 real entries
- ☐ FAQ page live
- ☐ Favicon on all browsers and phone home screen
- ☐ Share to WhatsApp and WhatsApp chat buttons tested
- ☐ Home page has only hero, services carousel and contact, under 500 KB; carousel loops, swipes and pauses correctly

Open questions

1. Is ₹400–900 a monthly or yearly hosting fee, and what decides the price within the range?

2. Should the site show course fees, or keep pricing "on request"?
3. Office address and city for Google Maps and local SEO?
4. Preferred domain name, and is it already registered?
5. Email for form alerts, and should alerts also go to WhatsApp?
6. Do "no master" and "locked" mean what this PRD assumes (no single-owner accounts; locked domain and production)?
7. Who supplies testimonials and photos, with written consent?
